

## **TRANSFER STUDENTS**

Any student who requests transfer into the Radiography Program must have earned at least a "C" in all transfer courses. Scholastic requirements outlined in the Angelina College Catalog will also govern the eligibility of the applicant for admission. Further consideration is based on the student submitting: (1) a letter of status from the Program Director of previous school, (2) a comprehensive description of Radiography courses and equivalent hours completed, (3) evidence of maintaining an overall "C" (2.0) GPA at previous school, and (4) two references from former instructors or clinical instructors regarding clinical performance. All transcripts, radiography course descriptions, syllabi, and official clinical competency records will have to be reviewed for transfer credit by the program director. Radiography program transfers must come from a JRCERT accredited program.
